STAT

MEMORANDUM FOR THE DIRECTOR OF ADMINISTRATION, CENTRAL
INTELLIGENCE AGENCY

SUBJECT: Five-Year Defense Plan - INFORMATION MEMORANDUM

1. The National Manager has asked me to provide you with an update on the National Security Agency's action plan for accumulating and consolidating civil agency information security (INFOSEC) requirements into our government-wide FY88-92 Five-Year Plan. We have just issued a data call to the INFOSEC office in your agency in a format approved by OMB. Essentially, we need your planned funding levels for INFOSEC equipment acquisitions and maintenance costs for the current year, the budget year (FY87), and five successive years through FY92. I solicit your support and cooperation to ensure the active participation of your INFOSEC personnel in this process. Your agency is an integral part of the INFOSEC community; therefore, your input is essential to any meaningful representation of a national program. Over the next six months, we must formulate a consolidated five-year profile of requirements in preparation for a senior level national review. The end result of this process will be the submission of recommendations to the System Security Steering Group. Any chance for an additional infusion of INFOSEC dollars to stem the flow of sensitive and classified information to our adversaries rests on our presentation of a consolidated, well-thought-out, well-justified program.

2. I cannot emphasize enough the importance of your participation in the program formulation process. If I or any of my staff can be of assistance to you, please call us
